

## Press Release

For immediate release April 20, 2011

### **Firelinx Purchased by Birket Engineering**

Orlando, Florida. Firelinx, Inc. ([www.firelinx.com](http://www.firelinx.com)) inventor of the patented Reliable Wireless mesh network pyrotechnic control system has been purchased by Birket Engineering ([www.birket.com](http://www.birket.com)) the world leader in ride control systems and special effects equipment to the theme park industry. "We researched every system out there, and found Firelinx to be both the safest and most advanced technology," reported Glenn Birket, CEO of Birket Engineering. "The theme park industry is very concerned about safety and reliability, and Firelinx already met all of their safety concerns." David Russell, CEO of Firelinx added, "Birket is a great partner for us. Our primary problem has always been just building enough systems to meet demand, and Birket's financial and engineering resources solve all of those problems for us. With their engineering and sales support we'll produce the safest, most reliable, and easiest to use system in the pyrotechnic and theme park industries."

"This will also allow us to offer unique and proprietary wireless solutions for many other special effects and theme park equipment designs, and allow some of our products to migrate into the Pyro industry," added Glenn Birket.

Details of the transaction were not disclosed. Firelinx will retain its brand name and logo, but will now be a division of Birket Engineering, Inc. Birket Engineering has been entertaining and thrilling audiences from behind the scenes since 1984. Their ingenuity and world-class experience in creating custom electrical and software control systems is found from the Las Vegas strip to Broadway and around the world. Birket's technology solutions are at the heart of major attractions in the world's major theme parks and attractions. For more information, please contact Firelinx at (407) 574-4600 or you can e-mail [daver@firelinx.com](mailto:daver@firelinx.com). Birket Engineering can be reached at (407) 290-2000.
